**AMEC STRENGTHENS MANAGEMENT TEAM
WITH KEY EXECUTIVE HIRES**

***Frank Masciocchi Joins as Vice President, Global Business;
Matt Ruby Joins as Vice President, Legal and General Counsel***

SHANGHAI, China, and SAN FRANCISCO, Calif., Sep. 4, 2007—Advanced Micro-Fabrication Equipment Inc. (AMEC), a leading Asia-based provider of proprietary innovative semiconductor processing technology and equipment, today added two key executives to its management team. Frank Masciocchi joins the company as vice president, global business and will lead AMEC's worldwide sales and customer support initiatives. Matt Ruby joins as vice president, legal and general counsel. He will assume responsibility for all legal affairs. The new appointments round out the executive team as AMEC positions its leading-edge products for the global semiconductor market.

"Frank and Matt fill two critical roles at AMEC and bring valuable experience to our growing company and global business development initiatives," said chairman and chief executive officer, Gerald (Zheyao) Yin. "We're building out our worldwide sales and service organization to create a superb support system for our customers. In tandem with that effort, we're putting a comprehensive legal infrastructure into place as we continue to expand our IP portfolio with new technology innovations and enhance our contracting and compliance practices. Frank and Matt will champion these vital initiatives. We're very pleased to welcome them on board."

Masciocchi brings more than two decades of semiconductor industry experience to AMEC. He joins the company from Litel Instruments, a San Diego-based provider of reticle products, where he served as senior vice president of sales and marketing. Before then, he spent 18 years at Nikon Precision, the U.S./European subsidiary of lithography giant, Nikon Corp. While there, he served in a series of increasingly responsible positions, most recently as vice president of sales and marketing. Prior to Nikon Precision, Masciocchi spent time at Eaton Corp. ending a seven-year tenure there as regional sales manager in Austin, Texas. He began his career at Intel Corp.

Ruby joins AMEC from Sanmina-SCI where he served as corporate counsel. Prior to that, he spent seven years at Foster City, California-based Applied Biosystems, where he served as senior counsel and manager of the legal department international group, leading the company's overseas legal affairs. His career includes senior legal positions at a mix of multi-billion-dollar corporations and emerging, venture-backed entities, including in-house service at semiconductor emulation/simulation leader Quickturn Design Systems and on the original founding team of Napster. He received his Juris Doctorate (J.D.) from Santa Clara University School of Law and a certificate in international and comparative law from Magdalen College, Oxford. He is a member of the California State Bar.

About Advanced Micro-Fabrication Equipment Inc.

Advanced Micro-Fabrication Equipment Inc. (AMEC) is a leading Asia-based semiconductor equipment company with a portfolio of proprietary wafer fabrication solutions designed to advance technology, increase productivity and reduce manufacturing costs for leading global semiconductor manufacturers. Strategically headquartered in the hub of the semiconductor manufacturing industry, AMEC's proprietary etch and chemical vapor deposition (CVD) systems combine unique technology solutions with economic innovations for the 65/45-nm nodes and beyond. AMEC's global infrastructure will include R&D, manufacturing, business and support operations in China, Japan, Korea, Singapore, Taiwan, and the U.S. To learn more about AMEC, please visit the company on the Internet at www.amec-inc.com.
